## About This Game

In Reus, you control powerful giants that help you shape the planet to your will. You can create mountains, oceans, forests and more. Enrich your planet with plants, minerals and animal life. There is only one thing on the planet that you do not control: mankind, with all their virtues and all their vices. You can shape their world, but not their will. Provide for them and they may thrive. Give them too much, and their greed may gain the upper hand.

## Key Features

- Control four mighty giants, each with their own unique abilities
- Terra-form the planet to your will, experiment with different terrain types
- A complex system of upgrades and synergies allows for endless styles of play
- Observe humanity, let your giants praise or punish them
- Enjoy an interesting art style and a strong soundtrack
- Enrich the planet with over 100 plants, animals and minerals
- Unlock new content by helping humanity achieve numerous developments

**Patch 1.4: Content update:**

In celebration of the upcoming release of our new game *Renowned Explorers: International Society* on September 2nd, we updated Reus!

**NEW SOURCES:**

- The Dolphin is now available in your seas!
- Natural Gas can now be mined!
- The Chinese crane can now roam your swamps!
- The Azure lakes are now available in your forests!
- The Oak Tree can now grow in your forests!

For the Russian players: we have also added the Russian community translation to the game.

Happy world building!. **Free copy of Reus for Kickstarter backers of Godhood! And a Godhood Stream later today!:** Thanks to the community's effort on social media, Kickstarter backers of our upcoming god game Godhood have unlocked a free copy of Reus! Next to that, there's a stream of Godhood later today. Read all about it in this kickstarter update:

<https://www.kickstarter.com/projects/abbeygames/godhood/posts/2422233>

**Godhood is now on Kickstarter!:**

We hope you enjoyed playing Reus as much as we enjoyed making it. We've learned a lot of lessons along the way and believe Godhood couldn't have happened without your support and enthusiasm.

---

As you may know, our upcoming game Godhood lets you create your own religion. But we also want to give you the chance to help create Godhood! You can do so by backing [the Kickstarter campaign](#) for the game, that just went live.

If Kickstarter is not for you, but you do want to help us out: there are other ways! We talk about it in this post over [on our community forum](#)[community.abbeygames.com].

Thanks for your help!  
From the Abbey,  
Sincerely,

-Joni

**. Patch 1.5: Platforms and performance update:**

It's Reus' birthday! To celebrate, we're giving Reus some love with an update.

**What's new?**

- Mac and Linux versions for Reus! We've eliminated crashes and improved performance. Reus should now run great on Mac and Linux.
- Overall better performance and small quality of life improvements, like much requested improvements to the UI text.
- Official Chinese Translations!

If you encounter problems, please let us know. We've moved the old 1.4 version to the [legacy] branch for your convenience.

We hope you have fun with Patch 1.5!. **Patch 1.6: Reus' Fifth Anniversary:**

It's five years ago since Reus came out! That calls for a little celebration and that's why we are finally releasing the soundtrack to the game this Thursday (through Steam as well!) and a little [Twitch Stream](#)[www.twitch.tv] of Reus on Thursday as well. And we have a new patch for you right now that most notably features:

- An **“Unlock All” option** in the Free Mode of the game. This gives you the option to be able to create all possible resources, without having to hunt for achievements. So you can go crazy deep and take your time, even in your first play-through.
- A lot of **small bug-fixes and rebalancing** to improve the overall quality of gameplay. See the [patch notes](#) for more info on these.
- Some **Abbey Games festivities** and community information in the main menu.
- An **FNA build of the game on Windows, that fixes memory issues** and corresponding crashes on 64bit versions of Windows. This build is still in beta, but if you suffer from said memory issues and crashes, feel free to switch to the special FNA-version branch to see if that fixes your problems.

If you encounter any problems, please let us know.

We hope you have fun with patch 1.6 and that you'll join us in celebrating Reus' fifth birthday this week!

~ the monks from Abbey Games
